

With a partner, analyze the Development Indicators and based on the economic and social data indicators, determine your countries Level of Development.

Once you have completed the chart AND answered questions 1-4, use questions 5-7 to complete the map provided. You will be tested over this information.

Level of Development / Country	MDC NIC LDC	Birth Rate	% Urban Population	Life Expectancy	GDP \$US Billion	Per Capita Income \$US	% Employed in Agriculture	Human Development Index Rank (HDI)
Germany		8.33	74%	80	\$3139	\$38,400	1.6%	8
Morocco		18.97	58%	76	\$164	\$5,000	16.6%	126
China		12.31	47%	75	\$11440	\$8,500	10.1%	90
Canada		10.28	81%	81	\$1410	\$41,000	1.9%	9
Bolivia		24.24	67%	68	\$52	\$4,900	10%	119
Bahamas		15.95	84%	71	\$11	\$31,400	5%	55
Zambia		43.51	36%	53	\$22	\$1,600	21.4%	139
Brazil		17.48	87%	73	\$2300	\$11,900	20%	75
Venezuela		19.88	93%	74	\$379	\$12,700	7.3%	71
Japan		8.39	67%	84	\$4490	\$35,200	1.2%	20
Italy		9.06	68%	82	\$1870	\$30,900	2%	27
Laos		25.68	33%	63	\$2	\$2,700	27.8%	138
India		20.6	30%	67	\$4500	\$3,700	52%	130
Iran		18.52	71%	70	\$1000	\$13,200	25%	69
USA		13.68	82%	78	\$15290	\$49,000	1.2%	8
Sweden		10.24	85%	81	\$387	\$40,900	1.8%	14
Sudan		31.7	40%	63	\$90	\$2,800	80%	167
Russia		10.94	73%	66	\$2400	\$17,000	4.5%	50
Yemen		32.57	32%	64	\$59	\$2,300	7.9%	160
Indonesia		17.76	44%	72	\$14700	\$4,700	14.7%	110

1. Analyze the development indicators of the countries on the chart. Label each country as MDC, NIC, or LDC. Each set of five countries has at least one MDC, NIC, and LDC. (You completed this on the front page. There is nothing to write down here).
2. As a group, share your findings and write down the development levels of all 20 countries on your student data table in the appropriate column. MDCs are also known as **core**. NICs (Newly Industrialized Countries) are sometimes called **the semi-periphery**. LDCs are also referred to as **peripheral** countries. We will look at core, periphery, semi-periphery more in later units. (Again, you will do this on the front page).
3. What three development indicators are used to calculate the **Human Development Index (HDI)**? (**Education has two dimensions**)
Use this website: [https://www.investopedia.com/terms/h/human-development-index-hdi.asp#:~:text=The%20Human%20Development%20Index%20\(HDI\)%20measures%20each%20country's%20social%20and,income%20\(GNI\)%20per%20capita.](https://www.investopedia.com/terms/h/human-development-index-hdi.asp#:~:text=The%20Human%20Development%20Index%20(HDI)%20measures%20each%20country's%20social%20and,income%20(GNI)%20per%20capita.)

A.

B.

C.

4. Using the HDI rank on the far right of your data table, label the countries 1-20 on your data table in the first column. The lower the number, the higher the level of development. If you have countries with the same rank, compare the other statistics to determine placement. (Again, complete on the front page).
Use Data Table 1 on the following website: https://www.theglobaleconomy.com/rankings/human_development/
The rankings for some countries may have changed. Choose three countries whose rankings have changed (either increased or decreased) and explain factors that MAY have contributed to this change. (This comes from you).

A.

B.

C.

5. Now you know the development level and name for all 20 countries on your data table. Using the world map provided, color the MDCs on the data table red, the NICs orange, and the LDCs yellow. If you do not know where the countries are located, google a political map.
6. Using a black marker or pen, draw a line separating the developed countries on your map from the NICs and LDCs on the map. This line is known as the **Brandt Line** or the **North/South Split**. What do you notice? What regions are MDCs, NICs, etc??

7. Describe the global distribution of the MDCs, NICs, and LDCs.

8. Describe the SPEED characteristics of MDCs, NICs, LDCs. (you can refer back to the Regional Analysis notes).
