

$\frac{3}{4}$	$\frac{49}{8}$	$\frac{6}{13}$
Method 1: Multiply by 1	Method 1: Multiply by 1	Method 2: Divide
$1 \overline{) 3.75} = \frac{75}{100} = 0.75$	$8 \overline{) 49.00} = \frac{125}{1000} = 0.125$	$6 \overline{) 13.00} = \frac{2166}{40}$

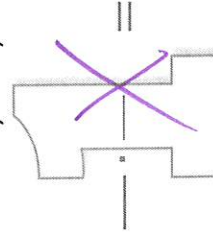

$\frac{3}{7}$	$\frac{13}{6}$	$\frac{2}{17}$
Method 1: Multiply by 1	Method 1: Multiply by 1	Method 2: Divide
$3 \overline{) 13.00} = \frac{28}{100} = 0.28$	$6 \overline{) 13.00} = \frac{2166}{40}$	$2 \overline{) 17.00} = \frac{850}{40}$

Is 7 a factor of 10, 100, or 1,000?

NO

Is 6 a factor of 10, 100, or 1,000?

NO
