

Geographers discuss human migration in terms of the following:

Push factors: those conditions and perceptions that encourage people to leave their homes and/or countries

Pull factors: those conditions and perceptions that attract people to certain locales from other places

The decision to migrate usually results from a combination of push and pull factors. Migration occurs on many scales – local, national, and international. **Forced Migration:** the conditions in which the migrant does not have a choice in the move, they must relocate out of fear for their life.

Directions: in the space to the left, identify each of the following as a push factor or a pull factor **and** decide if it is an **Economic (e), Social (s), Political (p), or ENvironmental (n) factor**. *If the move is not voluntary, write “forced”*

Immigration to the United States		
Push/pull	E, S, P, or En.	Scenario
		1. India now provides the second highest number of immigrants as Indians come to fill our employment gap in the medical and technological fields.
		2. More than 75% of Italians immigrating to the U.S. settled in the industrial cities of New York, Pennsylvania, and New England
		3. Beginning in the 1970s, growing numbers of Haitians made their way to America to escape the grinding poverty and political repressions of their nation.
		4. After 1880, harsh discriminatory measures against Jews were enacted and pogroms were frequent in Russia
		5. Mexico periodically experiences high levels of unemployment
		6. Students from Africa often come to study medicine at American universities
		7. In the 1830s, agricultural workers in Germany were displaced by the Industrial Revolution
		8. During the 1980s, Guatemala, El Salvador, and Nicaragua were all wracked by civil war
		9. Africans were sold into slavery and transported to the Americas
		10. German immigration, spurred by the Homestead Act, reached a peak of 1.4 million during the 1880s
		11. Puritans emigrated in order to escape religious persecution in Britain
		12. South Vietnam's U.S. backed government collapsed in 1975
		13. Early French settlers sought to organize a lucrative fur trading network
		14. Families of resettled Vietnamese were allowed to be reunited in the United States
		15. Ireland's potato crop was completely destroyed by blight disease in 1845 and 1846
		16. In 1915 and 1916, 1.5 million Armenians were slaughtered as the Ottoman Empire collapsed
		17. Castro led a successful Communist revolution in Cuba in 1959
		18. After 1848, thousands of Chinese arrived in California to work in the gold fields and on the transcontinental railroad

		19. The Refugee Act of 1980 increased the number of refugee visas that could be issued in a year
		20. Mexican immigrants are attracted to seasonal employment in the agricultural sector of the U.S. economy
		21. In 1848, an attempt to bring about a liberal revolution in Germany failed
		22. The development of widespread pineapple cultivation in Hawaii in the early 1900s attracted Japanese immigrant labor
		23. Between 1890 and 1920, overpopulation and a devastating infestation of the crop disease <i>phylloxera</i> had pushed southern Italy's agricultural economy to collapse
		24. Jewish migrants to the U.S. tended to settle in urban areas and in predominantly Jewish neighborhoods
		25. Under European laws of entail and primogeniture, estates could not be broken up and were inherited by the eldest son (they could not be split among all children)
Interregional Migration in the United States		
		26. The increased productivity of the American farmer made it difficult for individual farmers to earn a living
		27. High-tech workers are attracted to jobs in California and Texas
		28. After 1825, industries developed along the route of the Erie Canal
		29. Escaped slaves in the American south fled harsh conditions and possible death if captured
		30. At noon on March 3, 1889, "Unassigned Lands" in Oklahoma's Indian Territory were opened up for claim by homesteaders
		31. Gold was discovered at Sutter's Mill in 1849
		32. Retirees move to the Sunbelt where weather is milder and costs of living are lower
		33. The gentrification (economic investment and "fixing up") of lower income neighborhoods means higher taxes for longtime residents
		34. In the mid 1930s, severe drought and poor agricultural practices created the Dust Bowl in the central United States
		35. New York City provides many cultural opportunities
		36. During the 1950s, many middle class families moved to the suburbs to escape overcrowding, noise, and crime
		37. As the U.S. entered the postindustrial era, many factories were closed or were relocated
		38. Oil and gas exploration made Texas and Oklahoma boom states during the 1970s and 1980s
		39. During World War I, in what has come to be called "The Great Migration", 400,000 southern black migrants were attracted to wartime jobs in the North
		40. Faced with local hostility to their newly-formed church, Joseph Smith led the Mormons out of New York

Cite *specific* examples from the push/pull handout to illustrate each of the following. If you do not believe that a concept is represented, suggest an example. The examples on the push/pull handout apply to the United States, but you can use examples from other parts of the world if you know of them.

U.S. internal migration patterns (historical and contemporary)	Ravenstein's laws of migration (see handout)
The Gravity Model	Distance Decay
Step Migration	Chain Migration
Intervening opportunities	Forced migrations
Counter migrations	Cyclic movement
Periodic movement	Other?

What was the relationship between these migration patterns and Europe's demographic transition?
